

Arwa Mohammed

IT Engineer | Networks & Service Management

arwa.mohammed@evolio.dev | Riyadh, Saudi Arabia | <https://linkedin.com/in/arwa-mohammed-it> | <https://github.com/arwa-mohammed-it>

PROFESSIONAL SUMMARY

IT engineer with a focus on network support and service management. Builds practical tools that streamline support operations and improve user experience.

EDUCATION

B.Sc. in Information Technology, Princess Nourah University (2021-2025).

Field of specialization: Information Technology

CORE SKILLS

Networking, IT Service Management, Python, SQL, Linux, Cloud Basics

TOOLS & TECHNOLOGIES

Cisco Packet Tracer, Linux, MySQL, Django, Docker, Grafana

PROJECTS & ACADEMIC EXPERIENCE

Network Support Ticketing Platform

Role: IT Engineer - Duration: 3 months

Built a ticketing platform for network support, with categorized queues, escalation rules, and dashboards showing resolution times per category.

Tech stack: Django, PostgreSQL, Bootstrap, Docker

Outcome: Improved first-response time by 45% in a pilot.

Network Monitoring Dashboard

Role: Network Support Engineer - Duration: 2 months

Developed a monitoring dashboard that polls network devices, tracks uptime and latency, and raises alerts when thresholds are crossed.

Tech stack: Python, SNMP, Grafana, InfluxDB

Outcome: Detected outages an average of 8 minutes earlier.

TARGET ROLES

Network Support Engineer, IT Engineer, Cloud Support

ACHIEVEMENTS

- Designed a campus network topology for a final-year project.
- Built a ticketing platform piloted by a support team.
- Completed a cloud fundamentals certification.
