

Fatima

UI/UX Engineer | Design Systems & Usability

fatima@evolio.dev | Riyadh, Saudi Arabia | <https://linkedin.com/in/fatima-uiux> | <https://github.com/fatima-uiux>

PROFESSIONAL SUMMARY

UI/UX engineer who designs and builds accessible, user-centered interfaces. Comfortable across the full design process: research, wireframes, prototypes, and front-end implementation.

EDUCATION

B.Sc. in UI/UX Engineering, Effat University (2021-2025).

Field of specialization: UI/UX Engineering

CORE SKILLS

UI Design, UX Research, Figma, React, Accessibility, Prototyping, Design Systems

TOOLS & TECHNOLOGIES

Figma, React, Tailwind CSS, Storybook, Maze, Adobe XD

PROJECTS & ACADEMIC EXPERIENCE

Design System Dashboard

Role: UI/UX Engineer - Duration: 3 months

Created a design system with reusable, accessible React components, design tokens, and live documentation, enabling consistent UI across multiple products.

Tech stack: React, Storybook, Tailwind CSS, Figma

Outcome: Cut new-screen build time by ~35% through reuse.

Usability Testing Platform

Role: Product Designer & Developer - Duration: 2 months

Built a platform to script usability tasks, record completion and time-on-task, and visualize results, helping teams make evidence-based design decisions.

Tech stack: React, Node.js, MongoDB, Figma

Outcome: Used to run 8 studies informing a redesign.

TARGET ROLES

UI/UX Engineer, Product Designer, Front-End Developer

ACHIEVEMENTS

- Designed a design system adopted across 3 student projects.
- Improved task success rate by 22% in a usability study.
- Speaker at a campus design meetup on accessibility.
