

Ghadir Abdullah

Computer Engineer | Embedded Dashboards & Signal Processing

ghadir.abdullah@evolio.dev | Jeddah, Saudi Arabia | <https://linkedin.com/in/ghadir-abdullah-ce> | <https://github.com/ghadir-abdullah-ce>

PROFESSIONAL SUMMARY

Computer engineer who enjoys building embedded systems with meaningful dashboards. Combines low-level hardware work with clean data visualization for monitoring and control.

EDUCATION

B.Sc. in Computer Engineering, King Abdulaziz University (2021-2025).

Field of specialization: Computer Engineering

CORE SKILLS

C, Embedded Systems, Python, Signal Processing, PCB Basics, Data Visualization

TOOLS & TECHNOLOGIES

STM32, Arduino, Python, MATLAB, PlatformIO, Grafana

PROJECTS & ACADEMIC EXPERIENCE

Embedded Systems Dashboard

Role: Embedded Engineer - Duration: 3 months

Built an embedded dashboard that streams telemetry from an STM32 board, processes signals on-device, and visualizes live and historical data with configurable alerts.

Tech stack: STM32, C, Python, Grafana, UART

Outcome: Streamed 6 channels at 100 Hz with stable real-time plots.

Hardware Monitoring App

Role: Computer Engineer - Duration: 2 months

Developed a companion app that logs voltage, current, and temperature from a custom board and surfaces anomalies through a clean, color-coded interface.

Tech stack: Python, C, Qt, SQLite

Outcome: Caught 4 hardware faults during stress testing.

TARGET ROLES

Embedded Engineer, Hardware Engineer, Systems Engineer

ACHIEVEMENTS

- Built an embedded dashboard demoed at a senior project expo.
- Optimized firmware to halve power consumption on a sensor node.
- Mentored two juniors in embedded C programming.
