

Ibrahim Jameel

Computer Engineer | Embedded Systems & IoT

ibrahim.jameel@evoluo.dev | Khobar, Saudi Arabia | <https://linkedin.com/in/ibrahim-jameel-ce> | <https://github.com/ibrahim-jameel-ce>

PROFESSIONAL SUMMARY

Computer engineer passionate about connecting hardware and software. Builds embedded and IoT systems with real-time monitoring dashboards and reliable firmware.

EDUCATION

B.Sc. in Computer Engineering, KFUPM (2021-2025).

Field of specialization: Computer Engineering

CORE SKILLS

C, C++, Embedded Systems, IoT, Python, Microcontrollers, RTOS

TOOLS & TECHNOLOGIES

Arduino, Raspberry Pi, ESP32, PlatformIO, MQTT, Grafana

PROJECTS & ACADEMIC EXPERIENCE

IoT Device Monitoring System

Role: Embedded Engineer - Duration: 3 months

Built an IoT monitoring system that collects sensor data over MQTT, stores time-series readings, and visualizes them on a live dashboard with alerting thresholds.

Tech stack: ESP32, MQTT, Python, InfluxDB, Grafana

Outcome: Monitored 15 sensor nodes with sub-second update latency.

Hardware Monitoring App

Role: Computer Engineer - Duration: 2 months

Developed a cross-platform app that reads temperature, CPU, and voltage data from a microcontroller and displays it with historical graphs and warnings.

Tech stack: C++, Python, Qt, Arduino, Serial

Outcome: Detected thermal issues 5x faster than manual checks.

TARGET ROLES

Embedded Engineer, IoT Developer, Firmware Engineer

ACHIEVEMENTS

- Won 2nd place in a university IoT design competition.
- Built a low-cost air-quality monitor used in a campus lab.
- Published an open-source firmware library with 40+ stars.
