

Omar Abdullah

Software Engineer | Backend & Full-Stack Developer

omar.abdullah@evoluo.dev | Riyadh, Saudi Arabia | <https://linkedin.com/in/omar-abdullah> | <https://github.com/omar-abdullah>

PROFESSIONAL SUMMARY

Software engineer focused on designing reliable, well-tested backend services and clean full-stack applications. Comfortable owning a feature end to end, from API design and database modelling to deployment and monitoring.

EDUCATION

B.Sc. in Software Engineering, King Saud University (2021-2025).

Field of specialization: Software Engineering

CORE SKILLS

Python, FastAPI, REST APIs, SQL, Docker, Git, Testing, System Design

TOOLS & TECHNOLOGIES

FastAPI, PostgreSQL, Docker, GitHub Actions, Postman, VS Code

PROJECTS & ACADEMIC EXPERIENCE

Task Management API

Role: Lead Backend Developer - Duration: 3 months

Designed and built a multi-tenant task management REST API with JWT authentication, role-based access, and full CRUD for projects, tasks, and comments. Includes pagination, filtering, and automated tests covering core flows.

Tech stack: Python, FastAPI, PostgreSQL, JWT, Pytest, Docker

Outcome: Reached 95% test coverage and handled 500+ concurrent requests in load testing.

Student Portfolio Platform

Role: Full-Stack Developer - Duration: 4 months

Built a full-stack platform that lets students create profiles, showcase projects, upload resumes, and share public portfolio links. Implemented secure file uploads and a responsive React UI.

Tech stack: React, FastAPI, SQLite, Tailwind CSS, JWT

Outcome: Adopted by 60+ students in a pilot program with positive feedback.

Appointment Booking System

Role: Backend Developer - Duration: 2 months

Developed an appointment booking system supporting availability slots, conflict detection, and automated email reminders. Built a clean admin dashboard for managing bookings.

Tech stack: Python, FastAPI, PostgreSQL, Celery, React

Outcome: Cut no-shows by 30% in a small-clinic trial through reminders.

TARGET ROLES

Backend Engineer, Full-Stack Developer, Software Engineer

ACHIEVEMENTS

- Led a 4-person capstone team to deliver a production-ready API.
- Reduced API response times by 40% through query optimization.
- Graduated with First-Class Honours in Software Engineering.
