

Sarah Faisal

Computer Scientist | Full-Stack & AI Applications

sarah.faisal@evollio.dev | Riyadh, Saudi Arabia | <https://linkedin.com/in/sarah-faisal-cs> | <https://github.com/sarah-faisal-cs>

PROFESSIONAL SUMMARY

Computer scientist who builds full-stack applications and applied-AI features. Enjoys taking an idea from prototype to a polished, deployed product with a strong focus on code quality.

EDUCATION

B.Sc. in Computer Science, King Saud University (2021-2025).

Field of specialization: Computer Science

CORE SKILLS

Python, JavaScript, React, Machine Learning, Algorithms, REST APIs, SQL

TOOLS & TECHNOLOGIES

React, FastAPI, PyTorch, PostgreSQL, Docker, Git

PROJECTS & ACADEMIC EXPERIENCE

AI Project Recommendation System

Role: ML & Full-Stack Engineer - Duration: 4 months

Built a recommendation system that suggests relevant projects to students based on their skills and interests, using collaborative filtering and content-based features served through a REST API.

Tech stack: Python, FastAPI, PyTorch, PostgreSQL, React

Outcome: Achieved 0.82 precision@5 on held-out interaction data.

Full-Stack Web App

Role: Full-Stack Developer - Duration: 3 months

Developed a full-stack web application with secure authentication, a REST API, and an interactive dashboard, deployed with Docker and CI/CD.

Tech stack: React, FastAPI, PostgreSQL, Docker, GitHub Actions

Outcome: Deployed with automated CI/CD and zero-downtime releases.

TARGET ROLES

Software Engineer, Full-Stack Developer, ML Engineer

ACHIEVEMENTS

- Built a recommendation engine featured in a capstone showcase.
- Solved 300+ algorithmic problems on competitive platforms.
- Interned as a software engineer building production features.
